

Plantcam.live

An online exploration of an endangered hāhā

Name

Answer the following questions below by going to <https://www.plantcam.live/>.

1. Who is Caly? What dangers does Caly face?
2. Look at the live images. What does the weather look like up in the Wai'anae Mountains?
3. How is Caly being protected? Describe two conservation efforts that help ensure a future for Caly?
4. View the graph that shows short-term growth on the **Live Science** page. How many millimeters did Caly's stem grow in the last week, and how does this compare with other species?

5. Do changes in the environment seem to be affecting Caly's growth over the last week? Click through the different weather variables in the drop-down menu. Describe any trend that you may observe.

6. See what Caly's been up to by going to the **Milestones** page. Describe one event that occurred in the life of Caly?

7. Watch one of the time-lapse movies of Caly on the home page. Make two observations of change.

8. What is the most valuable thing you learned today?

Thank You!
